Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/519,066

Applicant(s)

DIEDERIKS ET AL.

Examiner

Edward Park

Art Unit

2624

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 13 November 2007 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. This action is responsive to applicant's amendment and remarks received on 11/13/07.
Claims 1-11 are currently pending.

Priority

2. In response to applicant's remarks, examiner acknowledges the Priority Document previously filed and withdraws the requirement for submission under 35 U.S.C. 119 (b).

Drawings

3. In response to applicant's amendment of the drawings, the previous drawing objections are withdrawn.

Claim Objections - 37 CFR 1.75(a)

4. The following is a quotation of 37 CFR 1.75(a):

The specification must conclude with a claim particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention or discovery.

5. **Claims 4, 9** are objected to under 37 CFR 1.75(a), as failing to conform to particularly point out and distinctly claim the subject matter which application regards as his invention or discovery.

Regarding **claims 4, 9**, the phrase, "closer to the presentation device", is interpreted broadly as possible. What is the scope of the phrase, "closer to the presentation device"? Is a light source 2 feet away in "closer to the presentation device" or 50 feet "closer to the presentation device"? The broadest interpretation will be utilized for examination purposes. Correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. **Claims 1, 4-11** are rejected under 35 U.S.C. 102(b) as being anticipated by Lys et al (US 6,166,496).

Regarding **claim 1**, Lys teaches a method of controlling at least one ambient light source, the method comprising the steps of:

receiving a video signal by a receiver (Lys: fig. 85; col. 49, lines 32-40, numeral 518 decoder 518 that is capable of decoding an incoming signal); presenting the video signal by a presentation device (Lys: fig. 85, numeral 561 television/entertainment device); characterized in

that the method further comprises the steps of: analyzing the video signal to determine video properties of the video signal; (Lys: fig. 85, col. 47, line 60 – col. 49, line 8, microprocessor processes certain portions of the bandwidth of television signal for signals relating to the room lights); and setting a property of ambient light generated by said at least one ambient light source based upon the determined video properties (Lys: fig. 85, col. 47, line 60 – col. 49, line 8, color and intensity of room lights may be directly controlled through certain portions of the bandwidth of television signal).

Regarding **claim 4**, Lys teaches setting the property of the ambient light generated by the at least one ambient light source that is closer to the presentation device (Lys: fig. 85, numeral 501; col. 50, lines 22-28 control data can be any data generator capable of generating data for controlling the illumination sources 501).

Regarding **claim 5**, Lys teaches setting the property of the ambient light is substantially synchronous with presentation of the video signal by the presentation device (Lys: col. 48, lines 1-26).

Regarding **claim 6**, Lys teaches setting the property of the ambient light is configurable (Lys: col. 48, lines 1-26).

Regarding **claim 7**, Lys teaches setting the property of the ambient light is configurable by a user preference (Lys: col. 13, lines 6-23).

Regarding **claim 8**, Lys teaches a system for controlling at least one ambient light source, the system comprising:

receiving means for receiving a video signal (Lys: fig. 85; col. 49, lines 32-40, numeral 518 decoder 518 that is capable of decoding an incoming signal); translation means for

translating the video signal into a displayable signal by a presentation device (Lys: fig. 85, numeral 561 television/entertainment device), characterized in that the system further comprises: processing means for analyzing the received video signal to determine video properties of the video signal (Lys: fig. 85, col. 47, line 60 – col. 49, line 8, microprocessor processes certain portions of the bandwidth of television signal for signals relating to the room lights), and for setting a property of ambient light generated by the at least one ambient light source based upon the determined video properties (Lys: fig. 85, col. 47, line 60 – col. 49, line 8, color and intensity of room lights may be directly controlled through certain portions of the bandwidth of television signal).

Regarding **claim 9**, Lys teaches processing means sets the property of the ambient light of the at least one ambient light source that is closer to the presentation device (Lys: fig. 85, numeral 501).

Regarding **claim 10**, Lys teaches synchronization means for synchronizing the presentation of the display signal on the presentation device with setting the property of the ambient light generated by the at least one ambient light source (Lys: col. 48, lines 1-26).

Regarding **claim 11**, Lys teaches a lighting unit comprising a light armature (Lys: figure 85, numeral 501) and the system as claimed in claim 8 (see rejection of claim 8).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. **Claims 2, 3** are rejected under 35 U.S.C. 103(a) as being unpatentable over by Lys et al (US 6,166,496) in view of Ludwig (US 6,689,947 B2).

Regarding **claims 2, 3**, Lys discloses all elements as mentioned above in claim 1. Lys does not disclose face recognition and facial expression recognition.

Ludwig teaches face recognition and facial expression recognition (see col. 32, lines 1-9 recognition of human facial expressions from video images have allowed the ability for the human face to be used as a controller for lighting).

It would have been obvious at the time the invention was made to one of ordinary skill in the art to modify the Lys reference to utilize face recognition and facial expression recognition as taught by Ludwig, to enhance the dynamics and functionality of the lightening system by providing a deeper integration of visual environment.

Response to Arguments

10. Applicant's arguments filed 11/07/07, in regards to **claims 1 and 8** have been fully considered but they are not persuasive. Applicant argues that the Lys reference does not teach the amendments to claims 1 and 8. This argument is not considered persuasive since the Lys reference still meets the limitations of the claims 1 and 8 even after the scope and limitations of the claims have been amended. See above for rejection of claims 1 and 8. Furthermore, applicant argues that video properties of the video signal incorporate, "calculating the average color of the received video signal" or the "the most prominent color, etc.". This argument is not

persuasive since the claims are read in light of the specification. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., calculating the average color of the received video signal" or the "the most prominent color, etc.") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant's arguments with respect to **claims 2 and 3** have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
